# innovation & craftsmanship

**Sakata Ornamentals Europe is proud to unveil our latest Cutflower Catalogue, showcasing exciting new introductions and top-quality genetics. This collection reflects our longstanding heritage, unwavering dedication, and innovative spirit.**

At Sakata, we are guided by values of discipline, finesse, and craftsmanship. These principles shape our breeding processes and product presentation, ensuring consistent quality and thoughtful decision-making.

In today's dynamic market, success depends on strong connections. Every link in the commercial chain - from breeder to consumer - must work in harmony to deliver exceptional products. Our extensive Lisianthus range exemplifies this approach, featuring standout series such as 'Alissa' and 'Rosita.' These series are bred to perform across diverse climates and cultivation techniques. Each new introduction undergoes rigorous multi-country trials and shelf life testing, ensuring only the highest quality reaches the market.

“Explore our novelties and featured products in this catalogue.”

**Helianthus Vincent** offers growers greater flexibility with its day-length neutrality, enabling high-quality production throughout the season.

Tsutomu Kagami (President and Representative Director)

**Vincent® Sunflowers** are distinguished by their large, round petals and upright flower heads that seem to meet your gaze with pride.

**Campanula Champion II** elevates this florist favourite with improved uniformity for growers, leading to faster harvests and increased profitability. Its upward-facing blooms, vibrant colours, and outstanding vase life make it a hit with florists and consumers alike.

**Matthiola Iron**, a unique Japanese-bred Stock, features tall, robust stems and tightly spaced florets, offering a sturdier alternative to traditional European varieties.

Guided by our motto - *Quality, Reliability, Service* - Sakata strives to enrich lives and cultures around the world.

We wish you continued health, prosperity, and success as you grow your business with Sakata genetics.

# Shaping tomorrow's ornamentals

At Sakata, every new variety or series we introduce is a source of pride. But before anything reaches the market, a great deal of care, testing, and quality control happens behind the scenes. Through extensive Research & Development trials and dedicated Product Management evaluations, we ensure only true eye-catchers make the cut.

“At Sakata only true eye-catchers make the cut.”

## **Best quality**

Our Product Management team travels worldwide to assess trials, maintaining the highest standards. By listening closely to growers, traders, and florists, we connect market needs directly to our breeders. With this method, our genetics are trusted, tested, and launched with confidence.

**R&D**  
Quality control

AGERATUM HOUSTONIANUM F1

# Horizon

- Larger blooms than traditional Ageratum
- Tall growing, with strong, sturdy stems and numerous branches
- Very floriferous

CUT FLOWERS

Blue

ANEMONE CORONARIA F1

# Gemstone

Anemone  
Gemstone Mix

# Gemstone

- Large flowers (8-10cm) in vibrant colours on long, sturdy stems (40 cm+)
- Healthy starting material due to being seedraised
- Suitable for high density production, bringing more profit for growers
- Long harvest window, extending shipment season
- 15 - 25 stems per plant
- Also available as Primax seeds

White

Red Bicolour

Red

Pink

Blue

# Admiral

- Early flower F1 hybrid suitable for winter production due to very uniform growth and flowering under short days
- Early flowering series: group 1
- Tightly-spaced florets on long flower spikes in bright clear colours

White

Yellow

Crimson

Pink Bicolour

Pink

Purple

## Striving for benefits for our customers

Part of our variety selection process is to check whether a new variety is meeting our customers standard for young plant production.

Together with these partners we are striving for improvements in performance which will be of benefit for young plant raisers and/ or growers. This can result in higher usability of seeds, shortening of lead time or a higher level of uniformity. As long as our customers will benefit.

ANTIRRHINUM MAJUS F1

---

# Snapstar

Antirrhinum  
Snapstar Champagne

ANTIRRHINUM MAJUS F1

# Snapstar

- Uniquely shaped double flowers in popular colours
- Early flowering: group 1, 2
- Good stem quality and easy to get stem length
- Excellent vase life
- Strong flowerspikes
- Both greenhouse and field production are possible

White

Yellow

Champagne

Pink

BRASSICA OLERACEA F1

# Condor

*Brassica  
Condor White & Red*

BRASSICA OLERACEA F1

# Condor

- Easy to get plant height
- Highly uniform production
- Early colouring, less cold is needed
- Deep and intensive colours
- A long-lasting colour at room temperature

White

Red

CALLISTEPHUS CHINENSIS

# Azumi XL

↖  
*Callistephus  
Azumi XL White & Blue*

CALLISTEPHUS CHINENSIS

# Azumi XL

- A real eyecatcher with huge, fully double pompon flowers
- Larger flowers than Bonita and Matsumoto series (up to 8 / 9 cm)
- Easy to grow
- Strong and heavy stems up to 80 cm
- Alternative cultivation: 4 to 6 long side stems and/or plant in multiple harvesting rounds

CUT FLOWERS

White

Red

Rose

Blue

CALLISTEPHUS CHINENSIS

# Bonita

Callistephus  
Bonita Mix

# Bonita

- Beautiful, fully-double pompon flower, no yellow heart
- Flower size is similar to Matsumoto
- Fits easily in a production program with Matsumoto
- High tolerance to Fusarium, similar to Matsumoto
- Uniform flowering window within a colour and the series

White

Pink

Scarlet

Rose

Red

Light Blue

Blue

Mix

# Matsumoto

- Fusarium-tolerant Aster
- Easy to program and stem height can be manipulated with various growing techniques
- Long and sturdy stems
- Flowers have distinct yellow centres
- Production cycle will be approximately 14 weeks from sowing in spring or when produced with day length manipulation techniques
- Uniform flowering window within a colour and the series

EUSTOMA GRANDIFLORUM F1

# Solo<sup>®</sup>

Solo is the world's first pollen-free series. It shares all the same qualities as Piccolo, the market standard for single-flowered Lisianthus. The flowers are very delicate yet strong.

-  Group 2
-  Double, medium-large flowered
-  Flowers are pollen-free
-  Next generation of single-flowered Lisianthus
-  Good transportability
-  Hard flower petals, less risk of damage

SOLO 2  
Pure White

250551

SOLO 2  
Violet

250559

# Viviana®

This single Lisianthus fits perfectly in the trendy wildflower style and is ideally suited for field bouquets.

- © Group 1 variety
- 🌸 Popular style for florists and floral designers
- 🌸 Strong blue colour
- 🌸 Long lasting in bouquets

# Helianthus

Since Sakata first brought F1 hybrid sunflowers to the market in 1987, we've focused our breeding efforts on pollenless, uniform varieties.

With the introduction of Vincent®s we have taken a major step forward in sunflower breeding. Vincent's sunflowers are special because of their large round petals and the upward facing flowers. Vincent's Choice was bred to be more day length neutral for greater flexibility in programming, allowing growers to produce high quality crops early, mid and late season.

Our complete sunflower portfolio delivers high-quality crops that thrive in all growing conditions.

**Vincent's Choice Summer DMR**  
Zeeland

*When you think of summer,  
you think sunflowers*

HELIANTHUS ANNUUS F1

# Sunbright

- A tall cut flower series bred for early flowering under short day conditions and low temperatures
- Uniform and vigorous habit under low temperatures and short days
- Strong flower stems and necks for upward-facing flower heads
- Less susceptible to botrytis at harvest stage
- Holds up well in long distance shipping

Supreme

Vincent<sup>®</sup>s

↗  
*Helianthus  
Vincent's Choice DMR*

*Proven resistant  
to Downy Mildew  
infection*

# Vincent<sup>®</sup>s

- For each season and territory there is a suitable variety
- Shorter crop cycle means increased margins
- Upward facing flowers making an attractive presentation at consumers
- An extra ring of rounded, overlapping flower petals making a more attractive flower
- Vincent's Choice DMR, Vincent's Choice Summer DMR and Vincent's Fresh DMR are proven resistency to Downy Mildew infection

*ISF Definition of Resistance: Resistance is the ability of a plant variety to restrict the growth and development of a specified pest and / or the damage they cause when compared to susceptible plants varieties under similar environmental conditions and pest pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest pressure.*

MATTHIOLA INCANA

# Arrow

Matthiola  
Arrow White

MATTHIOLA INCANA

# Arrow

- Cost-effective Stock
- 90% of the plants produce double flowers without manual seedling selection
- Strong stems with a good spike length and voluminous flowers
- Arrow is a mid-late flowering variety suited to a wide range of climate conditions, including warmer area
- Uniform habit and nice fresh green foliage

White

# Cheerful

- Strong stems produce voluminous, highly scented double flowers
- An extra-early flowering variety in cool climate areas
- 90% of the plants produce double flowers without manual seedling selection for a cost effective crop
- Uniform plant habit

Yellow

# Early Arrow

- Compared to Arrow, 'Early Arrow' is extra early flowering
- Suitable for short day conditions
- Excellent plant height and a good spike length
- 90% double flowering without seedling selection

White
