# DoubleShot™ Series

new series

F1 Antirrhinum majus

DoubleShot™ is a new series of tall garden F1 snapdragons with beautiful open-faced double flowers on strong, heavily branched plants. They produce flower stems in succession all through the growing season. DoubleShot™ snapdragons were specifically bred to maintain strong, tall stems in short-day production in warmer areas, making them also ideal for use in winter production for sub-tropical areas. Growing to a height of 45-50 cm (18-20"), DoubleShot™ is ideal as tall garden accents in flower beds or in container. Orange Bicolor is a dual AAS Winner for both garden and container performance!

- Dual AAS Winner for both garden and container performance!
- Beautiful open-faced double flowers
- Strong, tall stems
- Plant height up to 50 cm (20")

DoubleShot™ series

- Appleblossom
- Crimson Red
- Orange Bicolor
- Peach
- Yellow

DoubleShot™ Orange Bicolor

# Aloha versus Kona Blue

F1 Ageratum houstonianum

Aloha Blue

Kona Blue

Kona Blue outdoor performance

# Kona Blue

F1 Ageratum houstonianum

Kona is our most compact Ageratum and part of our “Low Grow” family, that requires no or little PGR use in production. It is heat tolerant and flowers from spring until frost. Kona is more compact than our Aloha series, so ideal for growing in packs as 10 cm (4”) pots. Excellent choice for large-scale production.

- Most compact and early flowering Ageratum in the market
- Genetic dwarf (Low Grow Approved)
- Compact and well branching plant habit
- Early and uniform in pot and pack
- Heat tolerant and flowers from spring until frost

Kona Blue

# Arrabona™ Bronze Leafed Red

Celosia plumosa

New colors added to our series of Celosia plumosa, including Fleuroselect Gold Medal winner Arrabona™ Red.

Excellent uniformity among the series varieties with a sturdy and well-branched plant habit. Ideal for landscaping with excellent garden performance under hot and humid conditions. Exceptional long flowering season from spring until frost. Plant height 35-40 cm (14-16") in cooler/drier climates, up to 45-50 cm (18-20") under warmer/more humid conditions. Arrabona™ is available in mix or single colors including Bronze Leafed Red.

- Great outdoor performance for garden, landscaping and in containers
- Excellent performance under hot and humid conditions
- Sturdy, well branched plant structure
- Brilliant flower colors
- Continuous heavy flowering all season long until frost
- Plant height 35-40 cm (14-16")

# Lovely Sky Blue

*Lavandula angustifolia*

A great new winter hardy lavender from seed that blooms the first year with no vernalization! Its mid-compact and strongly branching plant habit performs very well in patio containers or herb gardens. Lavender Lovely Sky Blue has beautiful light lavender flower spikes, providing a lovely fragrance which is highly attractive for bees and other pollinators

- First year flowering perennial
- No vernalization required
- Perfect for landscaping, patio or herb garden
- Free flowering all through growing season
- Outstanding pollinator plant, bee friendly
- Mid-compact with well-branched plant habit
- Plant height 30-40 cm (12-16")

Lovely Sky Blue

# Red Hill

*Salvia splendens* (tall type)

Red Hill is a heat-tolerant, tall bright-red flowering *Salvia splendens* that grows up to a height of 50-60 cm (20-24"). Strong basal branching allows it to develop a sturdy, robust plant with abundant flower spikes. Excellent performance in full sun and partial shade. Ideal for tall accents as background planting in the garden and also performs very well in large containers throughout the growing season until frost.

- Tall, vigorous, well-branched plant habit
- Plant height up to 60 cm (24")
- Long flower spikes extremely attractive to pollinators and hummingbirds
- Produces excellent color show all season
- Daylength neutral and heat tolerant
- Ideal for landscaping, background plantings and in large containers

Red Hill

# Twister Copper Red

*Rumex flexuosus*

Rumex Twister Copper Red is an unusual sorrel in our edible assortment. It has narrow copper colored leaves, wiry flower stems and a mounding, spreading plant habit which makes Twister a unique item to add color and texture to both the landscape or in mixed containers. The leaves are edible with a tangy lemon acidic taste. A surprising foliage novelty!

- Unique accent plant for mixed containers
- Mounding and spreading plant habit
- Edible with a tangy lemon acidic taste
- Perennial
- Surprising copper-colored foliage novelty!

Twister Copper Red young stage

Twister Copper Red

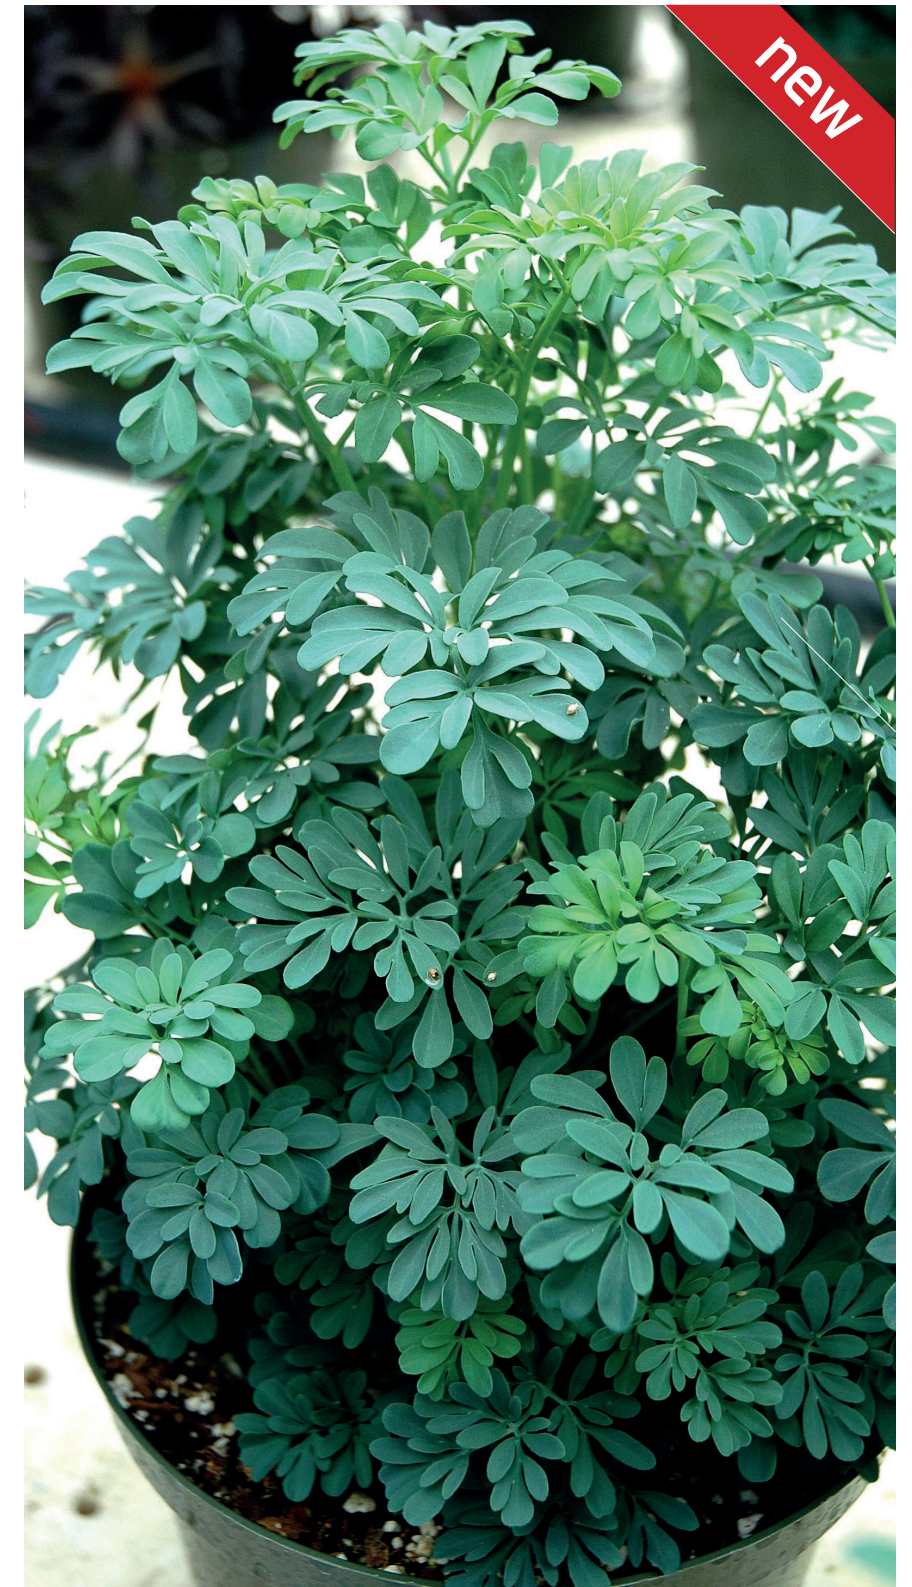

# Barry

*Ruta chalepensis*

Ruta Barry is a nice compact blue-green colored evergreen foliage plant. The distinctive leaf shape in combination with the blue-green foliage color makes this variety a great addition to the garden or in mixed patio containers. Ruta Barry is winter hardy and will produce yellow cup-shaped blooms in the second year during spring.

- Distinctive blue-green foliage plant
- Compact and branching plant habit
- Plant height 40 cm (16")
- Perfect in mixed containers for texture and foliage color
- Perennial

Barry

# Arctic Snow

*Leucanthemum x superbum*

Arctic Snow is a first year flowering winter hardy perennial. It is very early flowering and produces masses of white single traditional daisies all season long. It has a compact upright heavily-branching plant habit and grows up to 35-40 cm (14-16").

- First year flowering perennial
- No vernalization required
- Very early flowering with numerous classic yellow-centered white daisies
- Continuous flowering all through growing season
- Compact, upright well-branching plant habit

Arctic Snow

# Chiba™ Salmon

*F1 Dianthus interspecific*

Chiba™ Salmon is a new addition in our Chiba™ series. Its compact and well-matched plant habit within the series makes Chiba™ well-suited for high-density pack and small pot programs. Chiba™ shows clusters of well-rounded flowers with excellent garden performance all season long.

- Earliest flowering series of dianthus chinensis x barbatus
- Suited for production in packs and 10-12 cm (4-5") pots
- Heat, cold and rain resistant
- Excellent garden performance

Chiba™ Salmon

# Mambo GP Silver Blue

*F1 Petunia multiflora*

Mambo Silver Blue is a new color in our well-known Mambo GP series. Mambo GP - the benchmark for genetically dwarf multiflora petunias from seed - has a compact plant habit but show good vigor in the garden. Use of growth regulators is not necessary. Ideally suited for high-density production in packs or small pots. Plants are non-stretching and therefore easy to ship and maintain at retail.

- Non-stretching plant habit
- Best multiflora petunia for high-density production
- Normally NO plant growth regulators (PGRs)
- Eco-friendly
- Large showy flowers
- Great garden performance

Mambo GP Silver Blue

# Cello™ Strawberry Vanilla

F1 Viola wittrockiana

Pansy Cello™ Strawberry Vanilla is a new unique color in our large flowering pansy series. Cello™ is well known for its compact, non-stretching and strong basal branching plant habit.

The flowers stand solidly upright on short flower stems with a flower size of about 7 cm (2.5"). Cello™ is perfectly suitable for both spring and autumn programs.

- Unique color
- Excellent for spring and autumn programs
- Non-stretching and well-branched plant habit
- Perfect for packs and pots

Cello Strawberry Vanilla

# Xtrada™ Lemon Blotch

F1 Viola wittrockiana

Pansy Xtrada™ Lemon Blotch is a new addition in our extra large flowering pansy series. Xtrada™ combines a compact and well-branching plant habit with very large flowers of about 9 cm (3.5"). Plants

have a good heat tolerance and are perfectly adapted for late summer and early autumn.

- New color in extra-large flowering Xtrada™ series
- Very large flower size of about 9 cm (3.5")
- Heat and cold tolerant
- Perfect season extender

Xtrada™ Lemon Blotch

# Improved for 2023
